1966-1978 Ortho Pharmaceutical Company
 (subsidiary of Johnson & Johnson)
 Sales Representative
 Training Representative
 Division Manager in Louisiana, Mississippi,
 Alabama, Tennessee, Florida

1979-present Founder and President of TriStem.
 Has conducted and/or supervised hundreds of
 audits for clients, recovering millions
 of dollars in overcharges and over-
 payments. TriStem has clients in 50 states, Canada
 and Puerto Rico. Among TriStem's clients
 are the U.S. Government; states of Texas, Missouri,
 and Arizona; cities of New Orleans, Portland (Oregon
 and Maine), and Fort Worth; and companies like
 Exxon, Texaco, Hyatt, General Electric, and Pfizer.

Mr. Seeber founded TriStem in 1979 and has supervised thousands of utility bill audits resulting in recoveries and savings that exceed \$100 million. He will guide our staff as they work through the audit process. When the time comes for certain accounts to be verified in the field, Mr. Seeber's untold hours inspecting meters, transformers, streetlights, and other electrical facilities across the country will provide you with a level that other audit firms do not possess. In the recovery stage, his mission to see that the client is made whole will lend itself to the maximum attainable recovery, every time.

Over the last 35 years, TriStem has emerged as the nation's top firm in the field of utility bill audits. Few, if any, have more experience in negotiating directly with large utility companies than Mr. Seeber. His leadership experience cannot be matched in the following areas: knowledge of what causes over-billings, number of successful audits completed, proven

success with cases that resulted in multi-million dollar refunds, dollars recovered and saved, and proven ability to negotiate successfully with utility companies across the nation.

Furthermore, if a utility fails or refuses to properly rectify an overcharge. Mr. Seeber will, with the clients' approval, take the matter to the appropriate regulatory body or legal venue to see that each client receives the remedy it deserves. Clients include cities, counties, state agencies, federal agencies, school districts, water and sewer authorities, Fortune 500 companies, etc. His work includes bills audited from all 50 states, Canada, and Puerto Rico.

In 2005, WIRED FOR GREED, THE SHOCKING TRUTH ABOUT AMERICA'S ELECTRIC UTILITIES, was published. Co-Authors are Joe Seeber, and Jim Moore. Mr. Moore is the author of nine books, including one about the Kennedy assassination
